

Agrosun

Agrosun Bulbs: 430W Red (top left) • 600W Red (middle left) • 1000W Red (bottom left) • 1000W Gold (top right) • 400W Gold (bottom right)

Overview

Agrosun Bulbs

Exclusive to PARsource, Agrosun bulbs offer an enhanced spectrum for increased quality and growth.

These specially designed bulbs promote large blooms, resulting in increased volume and quantity.

The unmatched performance and durability of PARsource's Agrosun bulbs outshine the competition.

Features

Red Sodium Bulbs

The best choice for situations where high output supplemental light is preferred. More red and blue output results in enhanced flowering and increased crop volume.

- Super high red output for the best flowering
- Higher energy delivers better quality and crop turnaround time
- Recommended bulb for photoperiod control

Gold Halide Bulbs

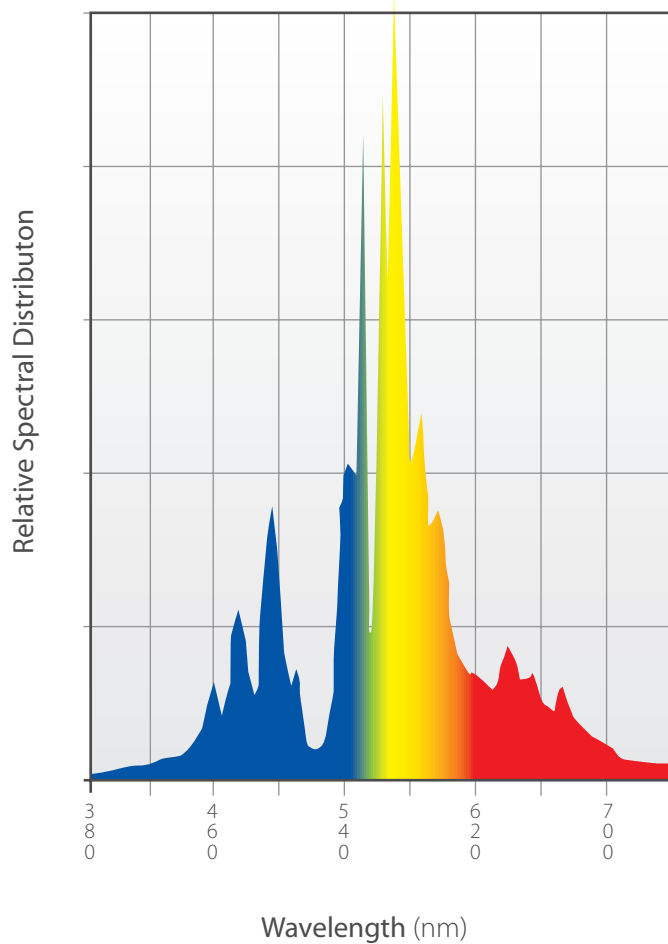

These bulbs provide a full spectrum for all-purpose growth and fruiting. Agrosun Gold Halide bulbs emit more red wavelengths than other competing halides.

- Preferred bulb for lettuce, micro green, and basil production
- Full and balanced spectrum is perfect for research applications
- Enhanced 49% higher red output—the only halide choice for start to finish growing

Agrosun Bulb Specifications

PRODUCT	DESCRIPTION	WATTS	SPECTRUM	COLOR	INITIAL LUMENS	POSITION	RATED HRS
BUSD1AG	Agrosun Red Sodium	1000	HPS	2K	146,000	Universal	24,000
BUSD600AG	Agrosun Red Sodium	600	HPS	2K	90,000	Universal	24,000
BUSD430AG	Agrosun Red Sodium	430	HPS	2K	58,000	Universal	24,000
BUHL1THUVSMG	Agrosun Gold Halide	1000	Halide	3K	110,000	Universal	12,000
BUSUHL1THHZAS	Agrosun Gold Halide	1000	Halide	3K	118,500	Horizontal	12,000
BUSUHL400HZAS	Agrosun Gold Halide	400	Halide	3K	40,000	Horizontal	20,000
