Heat Mat Controller

Overview

Commercial Heat Mats

Bottom heat is one of the most important and effective ways to improve germination and rooting. Our new, heavy-duty, modular, commercial heat mats will provide uniform heat for hundreds of seedlings or cuttings.

Seedling Heat Mats

The new, stronger heating wire and thicker, multi-layer construction offer more uniform heating and the durability to withstand rugged greenhouse environments.

Temperature Controller

This digital temperature control device allows gardeners to select and maintain optimum rooting temperatures for faster seedling or cutting growth.

Features (Heat Mats)

- Increases success of seedlings and cuttings
- Warms root area 10-20°F over ambient temperature to improve germination
- Light, watering and planting information on mat
- Waterproof construction
- 6' power cord
- Commercial Heat Mats: Daisy-chain up to four mats together; control and regulate all four with one Temperature Controller
- The only UL Listed seedling heat mats on the market

Features (Controller)

- Water resistant stainless steel temperature probe
- Provides constant optimum temperatures for crops
- Controls temperature in cold or warm environments
- Illuminated indicator light
- Three-prong grounded plug
- Compatible with all heat mats
